LED- 700/500 Spécification technique

CARACTÉRISTIQUES

Durée de vie :

- Pour les lampes halogènes, la durée de vie est généralement d'environ **1000 heures**.
- Pour les lampes LED (OSRAM), la durée de vie est supérieure à **50000 heures**

Spécifications

500 LED	Adust Color Temperature
Éclairement central	≥140,000 LUX
Température de couleur	300+/-500k, 4400+/-500k, 5000+/-500k
Indice de rendu des couleurs (Ra)	95
Irradiance totale	390W/m2
Taille du champ lumineux	160-20 mm
Durée de vie de la source lumineuse	50000h
Tension d'alimentation	AC110-240V 50/60Hz
Hauteur minimale d'installation	2900 mm
Consommation électrique totale	60W
Nombre total de LED	72 Pcs (12*6)
Profondeur d'éclairement	≥1300 mm
Ampoule LED	3.3mW/m2lx

700 LED	Adust Color Temperature
Éclairement central	≥160,000 LUX
Température de couleur	3800+/-500k, 4400+/-500k, 5000+/-500k
Indice de rendu des couleurs (Ra)	95
Irradiance totale	450W/m2
Taille du champ lumineux	160-280 mm
Durée de vie de la source lumineuse	50000h
Tension d'alimentation	AC110-240V 50/60Hz
Hauteur minimale d'installation	2900 mm
Consommation électrique totale	160W
Nombre total de LED	216 Pcs (18*6+18*6)
Profondeur d'éclairement	≥1300 mm
Ampoule LED	3.3mW/m2lx

Points d'évolutivité :

- **Double coupole LED plafonnier** conforme à votre exigence.
- **Intensité d'éclairage élevée (jusqu'à 160 000 lux)** adaptée aux interventions chirurgicales.
- **Température de couleur réglable couvrant la plage 4000–4500 K.**
- **Longévité des LED ≥ 50 000 heures**, ce qui assure une durée de vie utile importante.
- **Rotation mécanique complète (360°) des bras et des têtes**, pour une grande maniabilité.
- **Indice de rendu des couleurs élevé (CRI ≥ 95)** favorisant une meilleure perception des tissus.
- **Contrôle d'éclairage LED dimmable (fort potentiel de variation d'intensité)** au-delà des exigences minimales.
